SEMINARIOS AVANZADOS DE INVESTIGACIÓN

Git: Basic principles and use

Lecturer:

Prof. Dr. Karol Desnos (INSA Rennes , France)

Associate Professor at the National Institute of Applied Science (INSA) of Rennes.

Contents

In this seminar, the basic concepts of the git versioning system are introduced, assuming no prior knowledge on any versioning system. After presenting the motivations for using a versioning system, the basic mechanics behind git will be introduced both conceptually, and through the illustration of tool commands. A quick comparison of git with other Concurrent Versioning Systems (CVS), a presentation of tools and website based on git, and a set of good practices for git users conclude this seminar. Concepts presented during the lecture will be put into practice during a lab.

Language

English

Workload

Master students attending the event will get 1 ECTS. They should perform an additional home work.

Bachelor students will get 0.5 ECTS.

Timetable

Tuesday 9th May: 15:30h - 17:30h

Wednesday 10th May: 15:30h - 17:30h

Thursday 11th May: 15:30h - 17:30h

Room

Sala de Grados (A3004)

Registration

This seminar is mainly aimed at Master students and at the last two years of undergraduate.

Inscriptions should be done at the Master program secretary (room A6104), Julia Barahona (actividades@etsist.upm.es) or at the event room.
