

From 1st to 3rd of July the kick-off meeting of H2020-ECSEL project SWARMS (*Smart and Networking UnderWater Robots in Cooperation Meshes*) will be held in the ETSIST-UPM facilities with the participation of 30 partners from 10 European countries.

*“SWARMS project aims to expand the use of AUVs/ROVs and facilitate the creation, planning and execution of maritime and offshore operations, thereby making autonomous operations a viable option for new and existent industries. This will reduce the operational cost, increase the safety of task and help to expand the offshore sector”*

The Project coordinator is Prof. José-Fernán Martínez (jf.martinez at upm.es) from the GRyS research group of CITSEM-UPM
